

Taimoor Zaman

Work: Remote — +92-331-555-8803 — taimoorzaman.456@gmail.com

Senior AI Developer — LLMs — AI Automation — RAG Systems — AI Agents — Python — n8n — FastAPI

PROFESSIONAL SUMMARY

Results-driven **Senior AI Developer** with 5+ years of hands-on experience designing and deploying production-grade **AI automation systems**, **LLM-powered applications**, and **multi-agent AI frameworks**. Proven expertise in **Retrieval-Augmented Generation (RAG)**, **AI agent development**, and scalable workflow orchestration using **n8n**, **Python**, and **FastAPI**. Consistently delivers measurable business impact — including up to **70% reduction in manual operations** — by bridging cutting-edge AI models with robust, enterprise-ready backend systems.

EXPERIENCE

Senior AI Developer

Try Soft AI

Sep 2023 – Present

Pakistan · Remote

- Architected and deployed large-scale **AI automation systems** using Python and **LLM-powered AI agents**, achieving up to **70% reduction** in manual business operations across enterprise clients
- Designed and optimized end-to-end **RAG (Retrieval-Augmented Generation)** pipelines integrated with vector databases, improving AI response accuracy and contextual reliability for production deployments
- Built and deployed **multi-agent AI systems** using **LangGraph** and **LangChain**, enabling autonomous task distribution, memory retention, and adaptive decision-making across complex workflows
- Engineered **n8n-based automation workflows** connecting 10+ third-party platforms including Meta API, Google Sheets, Twilio, and email services, reducing cross-platform process overhead by **60%**
- Implemented **MLOps best practices** including CI/CD pipelines, model versioning, performance monitoring, and automated retraining to ensure continuous model reliability in production
- Mentored junior engineers on AI agent development, prompt engineering, and scalable system design, accelerating team delivery capability

AI Engineer

Try Soft AI

Jan 2022 – Aug 2023

Pakistan · Remote

- Developed, fine-tuned, and deployed **deep learning and machine learning models** for predictive analytics and intelligent process automation using **TensorFlow** and **PyTorch**
- Implemented **transformer-based NLP architectures** (BERT, GPT variants) and LSTM models for text classification, entity extraction, and conversational AI applications
- Designed scalable **data pipelines** and early **n8n-based AI automation frameworks**, laying the foundation for enterprise-wide workflow automation
- Integrated **REST APIs**, **cloud services (AWS)**, and database systems to enable dynamic data processing, real-time inference, and improved automation reliability
- Collaborated with product and business teams to translate requirements into production-ready **AI-driven solutions**, reducing manual reporting effort by **40%**

Junior Machine Learning Engineer

Try Soft AI

Sep 2019 – Dec 2021

Pakistan

- Built and trained foundational **ML models** for classification, regression, and predictive analytics, contributing to early-stage AI automation prototypes

- Performed **data preprocessing, feature engineering**, and hyperparameter tuning to optimize model performance and reduce inference latency
- Integrated trained models into **Python-based automation workflows** using Flask and REST APIs, improving execution time by **30%**
- Collaborated with senior engineers on **proof-of-concept AI systems** for data-driven decision-making, supporting successful client demonstrations
- Participated in model evaluation, A/B testing, and technical documentation to ensure production readiness and stakeholder alignment

EDUCATION

Comsats University Islamabad
Bachelor of Science in Computer Science

Pakistan
Sep 2015 – Jun 2019

PROJECTS

Multi-Agentic AI System for Workflow Orchestration | *LangGraph, LangChain, LLMs, Vector DBs, Python*

- Designed a **multi-agent AI framework** with four specialized sub-agents coordinated by a controller agent, enabling intelligent task distribution and autonomous multi-step workflow management
- Integrated **LangGraph** for inter-agent communication, persistent memory, and context-driven collaboration — reducing human intervention in complex business processes by **80%**
- Leveraged **vector databases** and RAG pipelines for real-time knowledge retrieval, improving agent response accuracy in dynamic environments

Autonomous WhatsApp AI Automation System | *n8n, Meta API, Google Sheets, Email API, Python*

- Engineered a fully autonomous **WhatsApp-based appointment booking and client management system** via n8n, eliminating manual scheduling overhead entirely
- Implemented real-time company knowledge retrieval, automated database updates, email confirmations, and reminder notifications using **AI-powered workflows**
- Integrated **Meta API, Google Sheets, and email services** for seamless end-to-end client handling with zero manual intervention

AI Voice Calling Agent for Real-Time Interaction | *Vapi, ElevenLabs, Twilio, n8n, Python*

- Built inbound and outbound **AI voice calling agents** capable of real-time human-like conversations for appointment scheduling and intelligent query resolution
- Integrated **Vapi, ElevenLabs, and Twilio APIs** for high-quality voice synthesis, dynamic call routing, and structured interaction logging
- Automated post-call workflows via **n8n** for CRM updates, customer verification, and automated follow-up task generation

TECHNICAL SKILLS

Programming & Development: Python, SQL, TensorFlow, PyTorch, Scikit-learn, OpenCV, REST APIs

AI & Machine Learning: Deep Learning (CNNs, LSTMs, Transformers, GANs), Generative AI, Reinforcement Learning, Vision-Language Models (VLMs), Fine-Tuning

LLMs & NLP: LangChain, LangGraph, RAG (Retrieval-Augmented Generation), AI Agents, Prompt Engineering, OpenAI API, HuggingFace, Chatbot Development

Computer Vision: Object Detection (YOLOv8, YOLOv9, YOLOv11), Image Segmentation, Object Tracking, Event-Based Vision Processing

AI Automation & Orchestration: n8n, Multi-Agent Systems, Meta API, Twilio, ElevenLabs, Vapi, Webhooks, API Integration, Data Automation Pipelines

Deployment & Cloud: AWS, FastAPI, Flask, Streamlit, Docker, CI/CD, MLOps, Model Versioning, RESTful APIs

Databases & Tools: MySQL, PostgreSQL, Supabase, Pinecone, FAISS, Postman, Git, GitHub, ETL Pipelines

Web & Frontend: HTML, CSS, React.js, Django, JSON, API-driven Applications
